Hybrid vs Online or In Person ? Which format is better?

A human connection is highly advantageous in our hybrid program, where the offline component is carefully designed to actively engage participants, providing a fully experiential and immersive learning experience. The in-person cohort practices and group learning sessions further enhance the overall learning journey.

The hybrid format combines the benefits of an in-person experience with the flexibility of online learning. Participants can enjoy the comfort of their homes, eliminating the need for travel or taking leave from work. This blend offers a uniquely immersive experience, allowing individuals to leverage the advantages of both modalities.

Additionally, participants have the option to avail themselves of reviews at a minimal cost, applicable to any of our future physical or online sessions, excluding logistical costs.
